

channels.listMembers

This method retrieves public profiles of users belonging to this group.

Parameters

Name	Type	Required	Parameter Description
token	String	Yes	Authentication token for the user
channelId	String	Yes	Identifier of the channel for which the membership information was requested
showPublicProfile	Boolean	Yes	If <code>true</code> , populate the public profile for each <code>ChannelMember</code> returned.

Response

A list of `ChannelMember` objects.

```
[
  {
    "userId": "u:xxxxxxx",
    "affiliation": "member",
    "publicProfile": {
      "id": "u:xxxxxxx",
      "firstName": "Nicole",
      "lastName": "Sullivan",
      "profileImage": "https://i.flockusercontent.com/xxxxxxx"
    }
  },
  {
    "userId": "u:yyyyyyy",
    "affiliation": "moderator",
    "publicProfile": {
      "id": "u:yyyyyyy",
      "firstName": "Bob",
      "lastName": "Hartnett",
      "profileImage": "https://i.flockusercontent.com/yyyyyy"
    }
  }
]
```

Errors

Error Code	HTTP Status	Description	Additional Parameters
UnknownChannel	400	The group provided in the <code>channelId</code> field can't be located
